

Miya was Highly Commended in the Sustainability Award Category at the Global Water Conference

The global water awards recognize what senior executives across the international water industry have acknowledged as the most important achievements of 2008.

Miya was shortlisted as a nominee to receive the sustainability award, which is given to projects or initiatives which represents the greatest contribution to social, environmental and financial sustainability of the water sector in 2008. The winners were announced at a special awards dinner held at the Global Water Intelligence Blue Green & Gold conference in Zurich on the 27th of April 2009.

Ariel Moshkovitz, VP Corporate Development in Miya, represented the company and received the certificate on its behalf in a ceremony in which Al Gore was present.
