

Urban Water Efficiency

Maynilad and Miya have joined forces in order to reduce NRW levels in the western zone of Metro Manila.

Miya, an Arison group company, is a global provider of comprehensive urban water efficiency solutions, with an emphasis on Non Revenue Water (NRW) reduction. The aim of Miya's solution is to reduce the utility's NRW to an economic level and maintain this improved level for the long term.

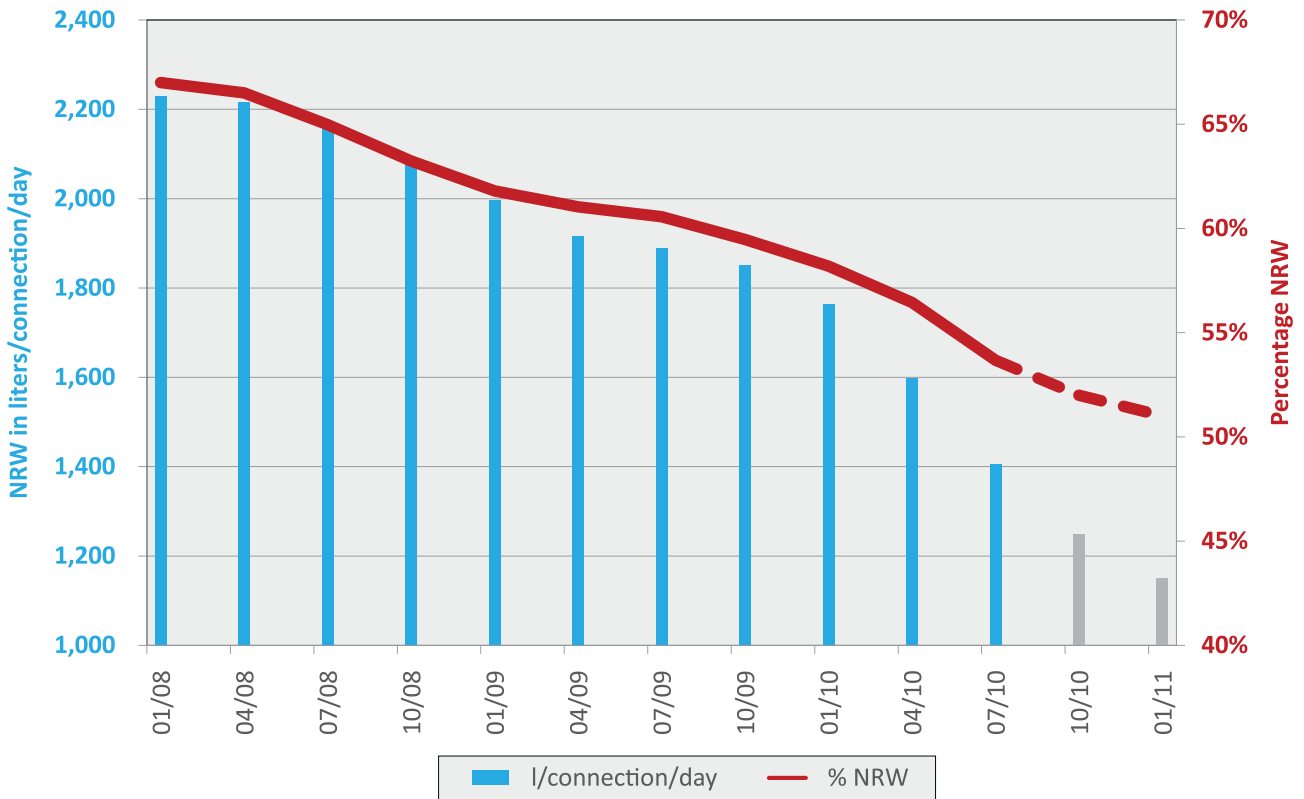

The solution includes audit and analysis of a city's water system, full project planning, management, execution, maintenance and training.

Miya delivers all the tools necessary for the mission: experience, expertise, global presence and local execution capabilities.

Maynilad Water Services, Inc. (Maynilad) is the water and wastewater services provider for the 17 cities and municipalities that comprise the West Zone of the greater Metro Manila area. In 1997, the company was granted a 25 year exclusive concession by the Philippine Government, through the Metropolitan Waterworks and Sewerage System (MWSS), to operate, maintain and invest in the water and sewerage system in these cities covering a population of 9 million people. Maynilad went through a change of ownership on January 2007, with the consortium of DMCI Holdings, Inc. (DMCI) and Metro Pacific Investments Corporation (MPIC) winning 84% of the water company's shares in a public international tender. Maynilad was recently granted a 15 year extension of the concession.

Maynilad NRW Reduction (6-months averages)

Milestones

- 💧 December 2007
 NRW at 67%
 Metro Pacific Investment & DMCI Holdings acquires Maynilad from the Government (MWSS)
- 💧 January 2008
 Central NRW Management created with intended staff of 448 personnel
- 💧 April 2009
 The partnership with Miya was sealed
- 💧 July 2009
 NRW below 60%
- 💧 July 2010
 NRW at 50%
 Maynilad has 400 staff in the Central NRW Department

Reducing NRW to 40% by the end of 2012 will enable supply of clean fresh water to an additional 3 million people
